

ATTENTION

Please read before installation

HYPER CLUTCH #MH01SD

TWIN CLUTCH #MM022SD

TRIPLE PLATE CLUTCH #MM023SR

PLEASE ADVISE DRIVER OF VEHICLE:

Installing a sports / performance clutch to suit the vehicle, Mitsubishi Evo 8 can transfer harmonic transmitted noises from the engine to the gearbox. This may also cause gearbox rattle. These transmitted noises will in no way effect the performance of the clutch or vehicle and is accepted in the performance industry where engine / clutch modifications have been carried out. These noises are also applicable to single plate cerametallic clutch applications.

Reference cause, replacement of an Exedy Silent Design long travel clutch
